SKILLS

-
- **Languages:** C++, Java, Python, JavaScript, SQL
 - **Web Technologies:** HTML, CSS, ReactJS.
 - **Backend & Databases:** Node.js, Express.js, MongoDB, MySQL.
 - **AI / Machine Learning:** Python (Pandas, NumPy), Natural Language Processing (NLP), ML Models.
 - **Tools:** MS Excel, PowerPoint, GitHub.
 - **Core Concepts:** Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks.
 - **Soft Skills:** Problem-Solving Skills, Adaptability, Time Management .

PROJECTS

AI-Art-Prompt-Generator-Chatbot | [Link](#)

March 2025 – May 2025

Project Summary:

An AI-powered chatbot designed to generate creative and context-aware art prompts in real time, helping users enhance creativity and idea generation through intelligent prompt suggestions.

Key Contributions:

- Developed a MERN-based real-time chatbot for generating AI-driven art prompts.
- Designed dynamic prompt generation logic to provide unique and customizable outputs.
- Implemented an interactive chat interface for seamless user experience.
- Enhanced user creativity by delivering instant, high-quality prompt suggestions.

Tech Stack: ReactJS, NodeJS, ExpressJS, MongoDB

SwasthyLite | [Link](#)

Aug 2025 - Nov 2025

Project Summary:

SwasthyLite is an AI-enabled healthcare application designed to support both urban and rural users by predicting possible health conditions based on symptoms, with special focus on accessibility in low-network and low-literacy environments.

Key Contributions:

- Built a MERN-based healthcare platform for symptom-based disease prediction.
- Integrated Machine Learning models for intelligent health guidance and early risk identification.
- Implemented voice-based interaction to assist users in rural areas with limited literacy.
- Designed the application to work effectively under low network conditions.
- Improved healthcare accessibility for underserved communities.

Tech Stack: ReactJS, NodeJS, ExpressJS, MongoDB, Python (ML), Pandas, NumPy

CareerLens-AI-- ATS Resume Analyzer | [Link](#)

Dec 2025 – Jan 2026

Project Summary:

CareerLens-AI is an AI-powered ATS + NLP resume analyzer that evaluates resumes against job descriptions, computes skill gaps, similarity scores, ATS readiness, and generates recruiter-style multi-page PDF reports for placement and hiring optimization.

Key Contributions:

- Built an NLP-based resume analysis engine to compare resumes with job descriptions.
- Implemented skill extraction and skill-gap detection to identify matched, missing, and extra skills.
- Developed ATS scoring engine with keyword density, section scoring, and resume maturity grading.
- Integrated semantic similarity model to measure resume–JD alignment.

Tech Stack: Python, NLP, Sentence-Transformers, Scikit-learn, ReportLab, Pandas, NumPy

TRAINING

Data Structures & Algorithms Training- Cipher School Certificate	June 25 – Jul 25
--	------------------

- Practiced and implemented core data structures including arrays, linked lists, stacks, queues, trees, heaps, hash maps, and graphs.
- Applied algorithmic techniques such as recursion, backtracking, divide & conquer, greedy algorithms, and dynamic programming to solve coding problems.
- Strengthened problem-solving skills through regular hands-on coding practice.
- Improved logical thinking and coding efficiency through structured problem-solving exercises.
- Solved practice problems to reinforce algorithmic thinking and coding consistency.

CERTIFICATES

- | | |
|---|----------|
| • C++ Programming -Udemy Certificate | Jan 2024 |
| • Bits and Bytes of Computer Network - Coursera Certificate | Sep 2024 |
| • Machine Learning and Deep Learning – NPTEL Certificate | May 2025 |

CO-CURRICULAR ACTIVITIES

Meenakshi Shikha Samiti - Volunteer	June 2024
--	-----------

- Assisted in educational support initiatives for underprivileged children.
- Contributed to organizing workshops and community engagement activities.

Disaster Management - Volunteer	Jan 2022
--	----------

- Participated in disaster preparedness and safety awareness programs.
- Supported community-level training on emergency response and basic first-aid practices.

EDUCATION

Lovely Professional University, Punjab, India	
--	--

- Bachelor of Technology – Information Technology
 - **Minor Specialization:** Artificial Intelligence & Machine Learning
 - **CGPA: 6.0**
- | | |
|--|---------------------|
| | Aug 2023 – May 2027 |
|--|---------------------|

Government Senior Secondary School, Baddi, Himachal Pradesh	
--	--

- Intermediate (PCM) | **Percentage: 60%**
- | | |
|--|---------------------|
| | Apr 2019 – Mar 2020 |
|--|---------------------|

Himshikha Adarsh Vidyalaya, Baddi, Himachal Pradesh	
--	--

- Matriculation | **Percentage: 76.8%**
- | | |
|--|---------------------|
| | Apr 2017 – Mar 2018 |
|--|---------------------|
